

Statistical Office
in Lublin

Everyone matters!

Our mission is to provide professional and objective statistical information, reflecting the socio-economic situation of the country and region accurately, optimally adjusted to changing needs of the recipients.

We are constantly improving and extending the offer of statistical products with the use of brand-new methods and technologies.

OFFICIAL STATISTICS

The **Official Statistics Law** of 29th June 1995 (Journal of Laws 2018, item 997 with later amendments) is the legal basis for activities of official statistics and it defines tasks and organization of official statistics services.

One of the basic rules of not only our Office but also all the entities of official statistics is to keep the **Statistical Confidentiality**.

TASKS OF THE OFFICE

- organizing and carrying out statistical research in the area of lubelskie voivodship, including general censuses and other research
- collecting, gathering, storing, establishing and analysing statistical data within the programme of official statistics research
- supporting local government units as well as counselling and expert units cooperating with the local government
- research, analytical and publishing activity in the area of cross-border and Euro-regional statistics
- keeping the national official register of the national economy entities – REGON – and the official territorial division of the country – TERYT.
- popularisation and promoting statistics and making knowledge of statistics more common

OFFICE SPECIALISATION

LUBLIN CENTRE
FOR REGIONAL SURVEYS

The main target of the **Lublin Centre for Regional Surveys** activity is popularisation of statistical knowledge of the region, supporting decision processes of regional and local governments, adjusting the statistical offer to the needs of recipients such as local and governmental administration bodies at the territorial level, perfecting solutions in regard to conducting regional surveys and analyses.

The tasks of the **Centre of Dwellings and Communal Statistics** include organization of surveys within the field of dwellings and communal statistics in the area of the country as well as developing the results of these surveys. The Centre mission is to provide comprehensive, professional and objective statistical information connected with dwellings and communal statistics.

The task of the **Centre of Construction Statistics** is initialising and executing methodological work, conducting and developing statistical research as well as establishing and publishing the results of statistical research and analyses in regard to construction statistics.
